Welcome to our 156th anniversary price listing. This past spring every one of us was affected by Covid-19 in some way or another. We are very fortunate to have worked through the pandemic shipping our hardy, northern grown plant material across the country to you. When things seemed uncertain, and they still are, coming to work and being able to talk with you about booking and shipping plant material, being able to work in the industry that we love not only because of the joy of plants, but the people we work with, was a saving grace in a very unusual time.

Thank you for being our customers and our friends.

Kind regards,
Ron Amos & Vickey Vanderhoof

Evergreen Seedling Gro-Plugs®

Your best finish ... starts with us!

Norway Spruce

← Healthy vigorous plant, in balance with the root system.

← Growing trays have deep inward ridges to keep roots from circling.

← Trays have large drainage holes to promote root pruning and branching.

Our 50 cell Gro-Plugs® are one-year old trees when they arrive at your business. We seed these in late February to early March and grow them for one growing season. This line is always strong with the plants having many great uses. We sell them to some of the largest grafting nurseries in the United States. These is a good chance that when you are getting in your grafted spruce and pine trees, they started from our Norway Spruce and White Pine Gro-Plugs®. These plants make great grafting stock as well as starter plants in your field or to pot up. We use these Gro-Plugs® in our bare root evergreen fields.

We have the best evergreen seedling plug available to the nursery industry. Our seedling plugs have healthy vigorous tops and root systems. Our growing trays are SureRoots 50 cell. It has American standard tray measurements of 11 ¼" wide by 21 ½" long. Each square cell measures 3.00" deep and 2.00" wide. Each cell has ridges along the sides, running from top to bottom to prevent root circling. The bottom has a webbed opening for perfect air-pruned roots.

*Note: Normally pine and fir varieties run 2" to 5" in height and spruce 4" to 8".

Evergreen Quart Liners

Time waits for no one ... but these liners will wait for you!

Many of our customers have asked for a reasonably priced container liner that is well branched, has a heavy root system, and has a larger window of time for planting. We start with a root-trained Gro-Plug® seedling or a rooted cutting. We pot into a 3½" square by 5" deep pot and grow them on to a two-year-old seedling or to a two-year-old cutting grown liner.

This pot provides ample room for well-formed root development. The plants are spaced with the necessary growing room to start forming healthy branches. Our cool, sunny summers and relatively low humidity promote thick stems and heavy branches. They are grown outside during the growing season and stored in unheated polyhouses in the winter.

One factor that makes our plants exceptional is our growing environment. Our evergreen quart liners are grown in an organic medium that encourages strong tops and heavy roots. Our native strains of ectomycorrhizae develop in our Gro-Plug® and quart liners early. Mycorrhizae fungus forms a beneficial association with the roots to enhance water and nutrient uptake. This relationship can be seen on the short feeder roots as a white threadlike mold. The roots and mycorrhizae work together to provide a healthier and larger plant. Plants will establish easier and grow faster in your nursery because of this beneficial fungus.

The quart liner is the ideal starter plant for field or container planting. As a container liner in its own pot, it does not need to be planted immediately and will wait until you are ready. We are confident you will find our evergreen quart liners a useful tool in your growing operation.

Plants are sold 18 pots per flat. 3 tray minimum; mix & match.

Bare Root Evergreens

Four-year-old Norway Spruce

We start our premier bed run liners by using our 50 cell Gro-Plugs® to plant out in the field. We grow them for three to four more years to produce our finished product. Our cool summers and cold Wisconsin winters are the perfect environment for growing strong thick tops and heavy root systems. When we harvest our finished bare root liners we normally find heavy mycorrhizae on the roots. Our growing conditions are ideal for the establishment of mycorrhizae. This native strain is a natural occurring fungus that works with the root system to help the plants take up more water and nutrients from the soil. The roots have visibly more branching than plants grown without this beneficial fungus. More branching on the roots means a faster established plant with a rapid growth rate in your field or container production.

Our cool summers help our evergreens have less stress than others in the summer months, but our harsh winters ensure you are getting very hardy plants for your production. A double bonus!

Our evergreens are harvested bed run. You will always be guaranteed straight leaders and the wonderful Evergreen Nursery root system we are known for. Growing our evergreens in the field and harvesting fresh in spring can always leave the door open for some Mother Nature issues like winter burn. When this happens, keep in mind most of these imperfections will disappear with age.

We have always had our niche in the market with this bare root line. If you haven't tried them yet, let us send you some samples so you can see the Evergreen Nursery difference.

Pete Polich our nursery manager showing a one year Gro-Plugs®, grown on 3 more years in our fields for the finished 4 year old bare root Norway spruce.

Evergreen Containers

We start with our Gro-Plugs® and pot those into an air pruned **ARPACC™** containers. These containers are the best that technology has out there right now for root systems. They offer a lateral root system, which prevents any circling, gives a 360° aeration and protects the root structure. These plants have superior root volume in this pot.

We remove the pot before shipping and put on a cotton mesh bag that is 100% biodegradable.

These little treasures are available this fall and spring for \$6.25 each. No quantity discount applies.

We pot our premier bed run evergreens into a #5 container in a container mix in early fall of the previous year. The evergreens root into the pots in fall at the ideal time for root establishment. Once the roots are partially established, they will provide the necessary energy for the plants to produce an excellent spring flush and a great root system.

The advantages of the containerized bare root evergreen are a heavy natural field root system that has been pruned for heavy branching, little noticeable set back of new growth often associated with planting bare root directly into the field, and an expanded planting time. These evergreen containers are ready to plant when you are. *No quantity discount applies.

Varieties include:

Picea abies
Picea glauca densata
Picea omorika

Deciduous shrub Liners 18 cell tray

Our deciduous liners offer a "pot of potential" for you!

We start our liners from our own softwood cuttings taken here at Evergreen Nursery in the summer months. Our cool growing season and relatively low humidity is perfect for rooting and growing cuttings. We have a high percentage of sunny days that rarely reach ninety degrees. We use less mist and need less disease control to grow plants with large tops and heavy root systems. Even though our plants may be pampered, our cold northern Wisconsin winters ensure the plants are as tough as can be.

What a money maker this product could be for you. Pot these liners in fall or spring and grow for one season and for most varieties you have a cost effective container to sell that season or the following spring. Or plant in your field in spring and have them ready for your landscape jobs the next season.

Try a sampling of product this spring and see if this might work for you. (3 tray minimum; mix & match)

Edible Line - Fruit Plants

One of our more popular garden center lines is our small fruits, grown in the 3 1/2" X 3 1/2" X 5" pots. Edibles have tripled in sales across garden centers and mail order catalogs, and we have the varieties you need at a great price.

Our fruit plants can be placed directly near a register or on a bench for immediate sales, just unpack and sell. For larger container sales, pot in fall for spring sales, or pot in spring for summer sales.

Sold as 18 pots per flat. (3 tray minimum; mix & match)

Birch & Deciduous Tree Liners & Containers

Bare Root Whitespire Birch

Our many years of experience growing birch from seed, micropropagation, and cuttings has made Evergreen Nursery a leader in birch propagation. We offer the newest varieties as well as the tried and true.

For the grower our bare root birch is a great liner. Plants are lined out in our field beds and grown one season. Cool summer temperatures and sandy soil promote sturdy tops and heavy, well-branched root systems. In late fall we dig the trees and store them over winter in our specially designed cooler that provides optimal temperature and humidity. No sweating is required when you receive our liners. They are ready to plant and grow on.

Our 38 cell Birch liners are started from both hardy seed source and tissue culture. Seedlings are transplanted into 38 cell trays that have deep inward ridges and a large drainage hole for optimal root training and pruning. Liners spend the growing season outside, forming strong stems and roots. Plants can be shipped from late fall through spring and planted into your field or containers.

Emerald Flare® Birch		\$4.15	\$3.75	\$3.59

REDIROOT™ Pots

All birch varieties are grown in the #3 REDIROOT™ pot. This unique pot offers a number of advantages over a standard pot. The open sides and bottom of the pot promote complete air pruning to produce a heavy well branched root system. This system also eliminates circling roots, developing a more natural root mass. The pot design allows perfect drainage and plentiful air exchange to prevent root pathogens and encourages strong vigorous roots. Plants are shipped without the pot in plantable biodegradable mesh covers. This also reduces shipping weight and saves you money. Pots are reused year after year, helping the environment by reducing the amount of plastic used and entering landfills.

Pots are planted with 4 stems per pot guaranteeing a minimum of 3 stems upon arrival.

Price per plant: \$15.00

** Plants marked with an asterisk have a royalty fee not included in the price. Royalty fee amount is in parenthesis.*

Care and Handling of Nursery Stock

Evergreen Nursery is pleased to offer our customers the highest quality nursery stock available. We make every effort to ensure that the plant material you receive is fresh and ready to plant. We would like to offer some suggestions on the care and handling of the stock you receive.

EVERGREEN BARE ROOT LINERS

Upon arrival of evergreen bare root stock, inspect plant material and place in a cool, humid building or shaded location. If the stock comes in plastic bales, usually via our semi trailer, they can remain in those bales for several days if you cannot plant immediately. Water bales to insure roots are kept moist. Never leave bales or bare root plants in full sun, even during planting.

Stock arriving in pallet crates via an LTL common carrier, or boxes via a ground transportation method, must be **unpacked immediately** and watered. If plants cannot be planted immediately, heel roots into moist soil or bark media material and keep moist and shaded. If left in the crate or boxes, and not in a cooler situation, plants can heat up as they are packed tight.

BIRCH BARE ROOT LINERS

Bare root birch liners will arrive in boxes or pallet crates. **Open and inspect plants immediately upon arrival.** Keep the plants in a cool, humid building or shaded location until planting. Roots should be covered and kept moist at all times. Avoid root exposure to sun, wind, and freezing temperatures during planting.

Our bare root birch liners are harvested in fall and stored in special high humidity coolers. The specially designed coolers make it unnecessary to sweat stock to promote bud break.

RIVER BIRCH

River Birch grown in 38 cell trays are stored frozen. The root plugs may arrive frozen and should be allowed to thaw before handling. Keep plants cool and moist in a building and away from direct sun until you are ready to plant. Sweating is unnecessary.

EVERGREEN GRO-PLUGS® IN 50 CELL TRAYS

Our evergreen seedling Gro-Plugs® are healthy, vigorous plants with strong, well-branched roots. Upon arrival inspect and water thoroughly. Plant as soon as possible. The plug should be slightly covered to avoid roots from drying out. Keep moist until plants establish (approximately 4 - 6 weeks) then water weekly depending on soil moisture or container media type.

DECIDUOUS 18 CELL LINERS, 15 CELL LINERS AND EVERGREEN 18 CELL LINERS

Our potted liners offer you quality at an affordable price. The container grown liners suffer virtually no transplant shock and extend your planting season. Inspect plants and water upon arrival. Before planting remove pot and rough up the root ball. Remove any circling roots. In many cases, the medium around the roots will fall away. This is beneficial to the root system allowing the roots to be in better contact with the soil or container medium and promote faster establishment. White mold surrounding the root ball is mycorrhizae and beneficial to the plant. Water after planting and then regularly as needed.

If you are unable to plant immediately be sure to water plants regularly.

Terms and Conditions of Sale

TERMS

With established credit, terms are as follows. 1% discount 10 days (no discount on credit card payments), net 30 days, after which a finance charge will be determined by applying a periodic rate of 1.5% per month for an annual percentage rate of 18% to the previous month's balance or by applying the prevailing maximum legal rate of interest as determined by Wisconsin state law.

Discounts will not be allowed when an older balance remains unpaid. All payments apply to the oldest invoices that remain outstanding.

Orders for future delivery will be booked only if previous season's account is current.

CREDIT

We can better serve you if you establish credit with us in advance. Application forms are available upon request from Evergreen Nursery or on our website.

If credit is not established prior to shipment, terms are cash in advance or credit card. We accept VISA, MasterCard, American Express and Discover.

Include your credit card account number, name of card holder, billing address, expiration date, and 3 digit V code when ordering.

CANCELLATIONS

We understand that at times it may be necessary to cancel an order. We request that you give us as much notice as possible, in writing, so we have an opportunity to resell the material. Any order cancelled after December 31st, will be subject to a 10% service charge. Cancellations after this date will result in our requesting a deposit or cash in advance on future orders.

RETURNED CHECKS - A \$25 charge will be assessed for returned checks.

CLAIMS

We accept all orders subject to crop conditions, and we reserve the right to cancel a portion of the stock, or all thereof, should injury befall our stock from hail, windstorm, frost, other weather conditions, error in count, insect and disease injury, or other causes beyond our control. We are careful to keep our varieties true to name and will replace, at our option, any portion of the stock that may prove otherwise, or refund the price paid for such portions. It is agreed that the original price shall be the maximum damages to which the purchaser is entitled. We will not be responsible for any other expenses, losses, or inconvenience which the purchaser may sustain as a result thereof.

Claims for any causes must be made in writing within 10 days after receipt of stock.

WARRANTY - There are no warranties, either expressed or implied, which extend beyond the description of the goods purchased by the buyer.

CHANGES - Prices, terms, warranties, and claim procedures are subject to change without notice.

STATE SALES TAX - Under the Wisconsin Sales and Use Tax Law, we are required to collect 5.00% state tax and applicable county tax on all gross sales of tangible personal property made in Wisconsin unless we are presented with a Tax Exempt Certificate to the effect that the property purchased is for resale or that the sale is otherwise exempt from sales tax. The law requires us to presume all sales are taxable unless an exempt status is established. Sales to Out-of-State customers are exempt.

If you are a Wisconsin customer or picking up in Wisconsin, please furnish us with a signed Certificate of Exemption (Form S-211) or we will be obligated to collect sales tax.

GENERAL OFFICE HOURS - 7:00 a.m. to 3:30 p.m. Monday through Friday.

SPRING 2021 EARLY PAYMENT DISCOUNTS - Orders paid in full will qualify for the following discounts if received by:

October 31, will earn a **5% discount**; November 30, will earn a **4% discount**; December 31, will earn a **3% discount**; January 31, will earn a **2% discount**

VOLUME DISCOUNT POLICY

Customer purchases are cumulative year to date, and discount levels are based on either last season's year to date total purchases, or the current year to date running total; whichever is greater. This greater year to date total will be used to determine which discount level will apply. Discounts are given at the time of purchase.

\$5,000 - \$10,000 - **2% Discount** \$10,000 - \$25,000 - **4% Discount** \$25,000 plus - **5% Discount**

NURSERY LICENSE REQUIREMENT

All customers must possess a valid State Nursery Dealer's License. We do not quote prices or sell to the general public retail consumers.

Order & Shipping Information

GROUND SHIPMENTS

All plant material shipped ground transportation requires special packing. These charges will be added to your invoice at cost and not subject to any discounts.

DELIVERY

All prices are FOB Sturgeon Bay. Rates are quoted upon request. Baling charges are included on bare root orders.

All orders travel at the risk and expense of the customer.

PICK-UP ORDERS

Please allow one week's notice to facilitate scheduling of your order. Bare root pick-up orders will be charged \$4.00 per bale for packaging and handling or appropriate box fee. When picking up your order, please bring a tarp or other covering to protect your plants.

SUBSTITUTIONS

Often times when your order is booked early, it is prior to our trees and shrubs being tagged or graded. Until late Fall, we are typically working from inventory estimates. If the size you have ordered is not available, we will substitute the same variety up or down one size at the same or lower price, unless advised otherwise. **Please inform us when ordering if substitutions are unacceptable.** If major changes occur in your order, we will call you.

PERMITS

Any charges incurred in obtaining permits necessary to facilitate the shipping of plant material is the responsibility of the customer and will be added to your invoice at cost.

LTL (LESS THAN A LOAD) PALLET SHIPMENTS

All plant material shipped on pallets requires different pallet size/shelving needs. These charges will be added to your invoice at our cost and not subject to any discounts. Rates are quoted upon request.
